## WHAT IS CLAIMED IS:

- 1. A method comprising:
- providing a notification message to a payment card holder of an attempted transaction using a payment card; and
- providing multiple options for the payment card holder to decline authorization of the attempted transaction.
- 2. The method of claim 1 wherein the multiple options comprise a first option for the payment card holder to decline authorization of an undesirable but non-fraudulent transaction, and a second option for the payment card holder to decline authorization of a fraudulent transaction.
  - 3. The method of claim 2 further comprising:
    receiving a selection made by the payment card holder of the first option; and
    based on the selection, providing a message to a merchant involved in the
    attempted transaction to decline the attempted transaction and to return the
    payment card to an individual attempting the transaction.
  - 4. The method of claim 2 further comprising:

    receiving a selection made by the payment card holder of the second option; and
    based on the selection, providing a message to a merchant involved in the

    attempted transaction to decline the attempted transaction and to withhold
    the payment card from an individual attempting the transaction.
  - 5. The method of claim 2 further comprising: receiving a selection made by the payment card holder of the second option; and based on the selection, locking an account associated with the payment card.

- 6. The method of claim 2 further comprising: receiving a selection made by the payment card holder of the second option; and based on the selection, automatically reporting the fraudulent transaction to a law enforcement authority.
- 7. The method of claim 2 further comprising: receiving a selection made by the payment card holder of the second option; and based on the selection, automatically reporting the fraudulent transaction to a credit reporting agency.
- 8. The method of claim 1 further comprising:

  receiving a selection made by the payment card holder of one of the multiple
  options to decline the attempted transaction; and

  sending a reason code to a merchant involved in the attempted transaction to
  indicate why the attempted transaction has been declined.
- 9. The method of claim 1 further comprising: providing an option for the payment card holder to authorize the transaction.
- 10. The method of claim 1 wherein the notification message indicates a transaction amount, a merchant name, and at least part of a number of the payment card.
  - 11. A system comprising:
  - a payment card transaction notification and authorization system to provide a notification message to a payment card holder of an attempted transaction using a payment card, and to provide multiple options for the payment card holder to decline authorization of the attempted transaction.

Attorney Docket No.: 1033-LB1049

12. The system of claim 11 wherein the multiple options comprise a first option for the payment card holder to decline authorization of an undesirable but non-fraudulent transaction, and a second option for the payment card holder to decline authorization of a fraudulent transaction.

- 13. The system of claim 12 wherein the payment card transaction notification and authorization system is further to receive a selection made by the payment card holder of the first option, and based on the selection, to provide a message to a merchant involved in the attempted transaction to decline the attempted transaction and to return the payment card to an individual attempting the transaction.
- 14. The system of claim 12 wherein the payment card transaction notification and authorization system is further to receive a selection made by the payment card holder of the second option, and based on the selection, to provide a message to a merchant involved in the attempted transaction to decline the attempted transaction and to withhold the payment card from an individual attempting the transaction.
- 15. The system of claim 12 wherein the payment card transaction notification and authorization system is further to receive a selection made by the payment card holder of the second option, and based on the selection, to lock an account associated with the payment card.
- 16. The system of claim 12 wherein the payment card transaction notification and authorization system is further to receive a selection made by the payment card holder of the second option, and based on the selection, to automatically report the fraudulent transaction to a law enforcement authority.
- 17. The system of claim 12 wherein the payment card transaction notification and authorization system is further to receive a selection made by the payment card holder of the second option, and based on the selection, to automatically report the fraudulent transaction to a credit reporting agency.

Attorney Docket No.: 1033-LB1049

18. The system of claim 11 wherein the payment card transaction notification and authorization system is further to receive a selection made by the payment card holder of one of the multiple options to decline the attempted transaction, and to send a reason code to a merchant involved in the attempted transaction to indicate why the attempted transaction has been declined.

- 19. The system of claim 11 wherein the payment card transaction notification and authorization system is further to provide an option for the payment card holder to authorize the transaction.
- 20. The system of claim 11 wherein the notification message indicates a transaction amount, a merchant name, and at least part of a number of the payment card.
- 21. The system of claim 11 wherein the payment card transaction notification and authorization system is further to increase a purchase limit threshold for the payment card based on a short message service (SMS) message received from the payment card holder.

## 22. A method comprising:

providing a notification message to a payment card holder of an attempted transaction using a payment card, the notification message indicating a transaction amount, a merchant name, and at least part of a number of the payment card;

providing an option for the payment card holder to authorize the transaction; providing multiple options for the payment card holder to decline authorization of the attempted transaction, the multiple options comprising a first option for the payment card holder to decline authorization of an undesirable but non-fraudulent transaction, and a second option for the payment card holder to decline authorization of a fraudulent transaction;

receiving a selection of one of the options made by the payment card holder; if the selection is of the first option, providing a message to a merchant involved in the attempted transaction to decline the attempted transaction and to return the payment card to an individual attempting the transaction; and if the selection is of the second option, locking an account associated with the payment card and providing a message to the merchant involved in the attempted transaction to decline the attempted transaction and to withhold the payment card from the individual attempting the transaction.
